Chromatographia Vol. 27, 1989 Author Index

Abe, I., 631
Adamczyk, Urszula, 24
Al-Meshal, I.A., 201
Alkorta, I., 77
Alvarez, R., 611
Arnold, D., 489
Ashraf-Khorassani, M., 441

Badjah Hadj Ahmed, A.Y., 205
Baeyens, W., 191
Baiocchi, C., 19
Balard, H., 311
Balizs, G., 489
Barriocanal, C., 611
Bauer, H., 238
Bauer, P., 601
Báthori, Mária, 253
Benická, E., 367
Berg, S., 55
Bertolo, P., 19
Biggs, W.R., 118, 285
Bighi, C., 625
Bitteur, S., 194
Blaffert, T., 343
Blo, G., 625
Blunden, G., 617
Bogaert, M.G., 243
Bonaga, G., 596
Bottalico, A., 425
Brinkman, U.A.Th., 181
Brochard, F., 257
Bruggeman, J., 191
Bruns, A., 340
Buchberger, W., 101
Burke, N., 209

Canga, C.S., 611
Canga, J.S., 611
Cash, Teresa, 559
Caude, M., 105
Çavrini, V., 185
Ćeranić, T.S., 306
Cerjan-Štefanović, S., 297
Ceva, P.L., 509
Chaves das Neves, H.J., 233
Chen Yaozu, 465
Chiavari, G., 216, 596
Cigánek, M., 109
Coenegracht, P.M.J., 135
Coenegracht-Lamers, P.J.M., 135
Cohen, J.R., 225
Coker, R.D., 49, 67
Côté, J.-E., 455
Ćzapinska, Katarzyna L., 123
Czok, M., 5

Daignault, L.G., 156
Davankov, V.A., 475

Chromatographia Vol. 27, 1989 Subject Index

Active carbon, in TLC, 297
Adsorption isotherms, 633
Adsorption processes, rate constants for, 333
Adsorption, on clinoptilolite, 306
Affinity chromatography, of metallopeptides, 247
Affinity chromatography, of nitrite ion, 461
Affinity chromatography, of pancreatic enzymes, 449
Affinity chromatography, of polythiollate peptides, 247
Aflatoxin, extraction of, 60
Aflatoxin, in maize extract, 49, 67
Aflatoxins, in sorghum grain, 617
Air pollution, 37, 44, 55
Alternaria mycotoxins, in foodstuffs, 425
Alumina, active, 56
Amine derivatives, detection limits of, 219
Amines, catabolic, dansyl derivatives of, 216
Amino acid profiles, 233
Amino acids, capacity factors for, 107
Amino acids, pre-derivatisation of, 105
Amino acids, retention times of, 303
Amino acids, tert-butyldimethylsilyl derivatives of, 233
Ampicillin in broncho-alveolar fluid, 243
Ampicillin in plasma, 243
Analysis, book review, 166
Analytical isotachophoresis, book review, 84
Analytical Spectroscopy, book review, 84
Animal fats, characterisation of, 31
Anion-exchange, on titania, 472
Anthraquinones in rhubarb, 465
Antibody, immobilisation of, 569

Biopolymers, retention behaviour of, 585
Bis(2,4,6-trichlorophenyl)oxalate, 191
Bonded phases, characterisation of, 405
Bonded phases, non-polar in TLC, 60
Bonded phases, synthesis of, 405

C13 NMR spectra, 285
Capacity factor, negative, 156
Capacity factors, 5
Capacity factors, of amino-polysulphides, 114
Carboxylic acids, in biological samples, 483
Carotenoids, 549
Catalysed reactions, 333
Cellulose triacetate, for LC, 77
Charcoal, activated, 37, 38
Charcoal, capacity of, 41
Chemometric optimisation, 135
Chiral derivatisation reagent, 301
Chiral recognition mechanisms, 15
Chiral recognition, mechanisms of, 475
Chiral recognition, thermodynamics of, 475
Chiral stationary phases, 535, 541
Chlorophyll-bonded stationary phase, 461
Chromatography, book review, 266
Chromatography, droplet counter current, 549
Chromosorb W HMDS, 412
Clinoptilolite, as GSC packing, 306
Clinoptilolite, surface properties of, 306
Cold capillary-injection, 209
Column efficiencies, 109
Column liquid chromatography - see LC
Column parameters, 5
Column residence time, tm, 156
Computational chemistry, book review, 515
Computer graphics, 77
Computer program, for retention prediction, 420
Cyano(pheophytinato a)cobalt III stationary phase, 461
Cyanoalkyl phases, characteristics of, 149
Cyanoalkyl phases, structure effects, 147

Dead time correction, 205
Derivatisation, on-line, post-column, 225
Derivatisation, pre-column, 185
Desorption, thermal, 56
Detection, by evaporative light scattering, 340
Detection, chemiluminescent, 191
Detection, electrochemical, 216
Detection, fluorescence, 243
Detection, fluorometric, 185, 243
Detection, radioimmunoassay, 101
Detector, coulometric, flow-through, 292
Detector, flame photometric, quenching of, 159
Detector, microwave plasma, 44
Dihydroxyl aromatics, capacity factors for, 630
Dimethyl sulphoxide, 44
2,4-Dimethylthiazole, 194
Displacement development, 253
Dissociation constants, of weak bases, 194

ECD, constant current mode, 71
ECD, non-linearity in, 71
ECD, space charge model, 499
Electroanalytical techniques, book review, 515
Electron capture detector - see ECD
Elution order reversal, 15
Enantiomeric elution order, 15
Enantiomeric separation, 105
Enantioselectivity, 475
Energy calculations in LC, 77
Enthalpies of solutes, by LC, 376
Ethylene oxide, trace determination of, 469

Fast atom bombardment-MS, 128
Fatty acid methyl esters, GC of, 436
Flame ionisation detector - see FID
Flavinoids in plant extracts, 509
Flavonoids, retention behaviour of, 625
Florisil clean-up procedure, 617
Fluorimetric detection, 185, 243
Free energies, at infinite dilution, 359
Frei, Roland W., 181
FTIR detection,in LC, 441

Gas chromatography - see GC
GC analysis and process control, book review, 378
GC capillaries, end-sealing for, 631
GC capillaries, static coating of, 631
GC columns in series, 494
GC fingerprinting, 31
GC stationary phase, volatile, 359
GC stationary phases, loadability of, 60
GC study, of modified silicas, 311
GC, automatic, 55
GC, capillary, injector for, 221
GC, capillary, large samples for, 221

GC, headspace, of ethylene oxide, 469
GC, inverse, 311
GC, inverse, 412
GC, isotope effects in, 552
GC, linear temperature programmed, 367
GC, of ^{3}H and ^{14}C labelled compounds, 552
GC, of alkylbenzenes, 494
GC, of C2-C4 hydrocarbons, 55
GC, of carboxylic acid trichloroethyl esters, 483
GC, of chloramphenicol, 489
GC, of chloromethanes, 644
GC, of coke oven gas, 611
GC, of ethyl carbamate in beverages, 209
GC, of fatty acid methyl esters, 31
GC, of hydrocarbons, 182, 306
GC, of linear alkenes, 544
GC, of linear alkynes, 544
GC, of methyl bromide, 37
GC, of sulfur compounds, 159
GC, of thiophenes, 44
GC, of *trans*-diazenes, 581
GC, on immobilised PEG, 109
GC, on ion-exchange resins, 644
GC, on micropacked columns, 182
GC, on PEG 20M, 412
GC, on-line control, 611
GC, optimisation of, 494
GC, partial molar free energies by, 359
GC, physicochemical quantities by, 333
GC, programmed, optimisation of, 367
GC, radio, 552
GC, reversed flow technique in, 333
GC-ECD, 71
GC-FTIR, of amino acids, 233
GC-MS workstation, 209
GC-MS, of azines, 596
Gel filtration chromatography - see SEC
Glucose-maltose-maltotriose ratios, 328
Golay, M.J.E., 533

Haemoglobin, screening of, 233
hEGFs in biological fluids, 574
Hepatocytes, metabolism of, 639
Herbicides, LC of, 431
High-performance liquid chromatography - see LC
HPLC - see LC
HPTLC - see TLC
Hydrocarbon quenching of FPD, 159
Hydrocarbons, thermodynamic properties of, 544
Hydrodynamic chromatography, 585
Hydrodynamic voltammetry, of Alternaria toxins, 426
Hydrolysis, measurement of, 225

IC in water analysis, book review, 266
IC, of lanthanides, 316
IC, of M++ ions, 316
IC, of nitrite and nitrate ions, 461
IC, on modified silica, 316
IE distribution coefficients, 622
IE resins, chelating, 622
IE resins, exchange capacities of, 622
IE, of pancreatic enzymes, 449
IE, of polyvalent ions, 472
IEC, of heterocyclic formazane derivatives, 622
IEC, of human chorionic gonadotropin hormone, 601
Immunoaffinity chromatography, 569, 574
Injection, cold capillary, 209
Injector, on-column, 221
Ion chromatography - see IC
Ion-exchange chromatography - see IEC
Ion-exchangers, 535, 541
Iridoids, LC of, 24

Kováts indices, 205

Labelling with fluorogenic reagent, 185
Laboratory practice, book review, 84
LC of bio-oligomers and bio-polymers, book review, 166
LC stationary phases, selectivity of, 371
LC, amperometric detection in, 428
LC, capillary, 238
LC, chiral phases for, 475
LC, column residence time, 156
LC, column-switching system, 574
LC, computer modelling of, 77
LC, coulometric detection in, 427
LC, flow programming in, 417
LC, gradient elution in, 19
LC, ion-pair of nucleobases, 639
LC, ion-pair of nucleosides, 639
LC, ion-pair of nucleotides, 639
LC, microbore, 441
LC, microcolumn, 417
LC, new bonded phases for, 404
LC, non-linear, 321
LC, of (-)-cathinone, 201
LC, of 1,n-di(alkoxy)-polysulphides, 27
LC, of Alternaria micotoxins, 425
LC, of amino acids, 129
LC, of amoxicillin, 243
LC, of ampicillin, 243
LC, of amylases, 328
LC, of basic aroma compounds, 194
LC, of Br and I thyronines, 101
LC, of carboxylic acids, 340
LC, of catabolic amines, 216
LC, of chiral amino acids, 301
LC, of dansyl amino acids, 191
LC, of dialkylamino-polysulphides, 113
LC, of elastin hydrolysis products, 225
LC, of enantiomers, review of, 475
LC, of flavinoids, 509
LC, of flavonoids, 625
LC, of glucosides and glycerides, 340
LC, of herbicides, 431
LC, of human epidermal growth factor, 569, 574
LC, of labetalol HCl, 364
LC, of macromolecules, 585
LC, of PAH's, 118, 147, 285
LC, of pentstemide, 24
LC, of peptides, 228
LC, of PTH-amino acids, 417
LC, of racemic diastereoisomers, 364
LC, of Se and Te, 292
LC, of serrulatoloside, 24
LC, of steroids, 441
LC, of substituted quinolines, 19
LC, of thiols, 185
LC, of uric acid, 467
LC, on bonded liquid crystals, 559
LC, on C18-silica, 378
LC, on carbon, 633
LC, on cellulose, 15
LC, on chiral stationary phase, 15
LC, physico-chemical applications of, 633
LC, physico-chemical model of, 628
LC, preparative, 591, 601
LC, preparative, of carotenoids, 325
LC, retention data for, 20
LC, retention in, 15
LC, retention parameters in, 5
LC, retention prediction in, 19
LC, reversed-phase, retention in, 5
LC, secondary flow effects in, 238
LC, semipreparative, of furocoumarin isomers, 591
LC, stereoselectivity in, 15
LC, temperature programming in, 417

LC, turbulent flow in, 238
LC, with multisolvent mobile phases, 135
LC, with unresolved peaks, 343
LC-MS, of peptic haemoglobin hydrolysate, 128
Liquid crystal stationary phases, 436
Liquid crystals, bonded, synthesis of, 559
Luminescence, enhancement of, 191

Mesomorphic polysiloxanes, as stationary phases, 436
Metallothionein, 247
Methyl anthranilate, 194
Methyl-bi-isooctyl phosphate stationary phase, 292
4-(6-Methylnaphthalen-2-yl)-4-oxobuten-2-oic acid, 185
Microfungal cultures, 328
Micropacked columns for GC, 182
Microscale LC, book review, 266
Mobile phase, optimisation of, 101
Mobile phases, alcoholic modifiers for, 15

n-Alcohols, conformation of, 311
NMR 13C, 228
Non-homologous compounds, retention of, 19
Numerical interpolation, 205

ODS phases, 285
Optimisation criterion, 367
Overpressured layer chromatography, 591

PAH's, 405
PAH's, capacity factors for, 153
PAH's, characterisation of, 285
PAH's, GC of, 436
PAH's, large, 285
PAH's, LC of, 285
PAH's, planarity recognition in, 285
PAH's, retention and structure, 147
PAH's, retention of, 118, 120, 291
Pancreatic enzymes, LC of, 449
Pancreatic enzymes, purification of, 449
Paper chromatography - see PC
Parsley, 549
Peak deconvolution, 343
Peak labelling, 343
Peak profiles, simulation of, 321
PEG 20M, on silanised support, 412
PEG 20M, properties of, 412
PEG 20M, structure of film, 412
PEG on Chromosorb W, 109
Peptides, arginine-aldehyde, 228
Phase ratio, evaluation of in LC, 378
Pheophytin a, 461
Plasma, cathinone in, 201
Polyaromatic hydrocarbons - see PAH
Polystyrenes, retention behaviour of, 585
Potentiometric titration, 194
Pre-chromatographic development, 49
Principal components analysis (PCA), 343
Programming, simultaneous flow and temperature, 417
PTH-amino acids, retention data, 417
PTH-amino acids, retention prediction, 417

Quantitative analysis, book review, 167

Racemate ratio, determination of, 364
Radio GC, 552
Residue analysis in meat and milk, 489
Retention and surface coverage, 378
Retention effects of nitrogen, 113
Retention effects of sulfur, 113
Retention index - see RI
Retention model, for SEC, 257
Retention of polysulphides, 27, 28
Retention prediction, computer assisted, 417
Retention, in binary eluents, 6
Retention, of alcohols, 371
Retention, of alkanes, 371
Retention, of homologous series, 5
